find.IF.JCR	<i>find.IF.JCR Journal Citation Reports (JCR) Impact Factor</i>
-------------	---

Description

This function gives the Impact Factor of the journal(s) provided by Journal Citation Reports (JCR) Thomson Reuters for the year 1997 to 2019. If the output shows a NA for a journal, it means that the journal has never been in JCR list.

Usage

```
find.IF.JCR(journals, year, exact.match = TRUE)
```

Arguments

`journals` a character vector containing journals whose impact factor is required
`year` scalar, the year for which impact factor is required. If not mentioned, then impact factor for all year is displayed.
`exact.match` logical.

Value

impact factor of the journal(s)

Examples

```
find.IF.JCR("ieee access")
find.IF.JCR( "ieee access", year=2016)
```

JCRImpactFactor

Journal Citation Reports (JCR) Impact Factor by Clarivate Analytics

Description

This package provides the Impact Factor of a journal reported by Journal Citation Reports (JCR) of Clarivate Analytics. The impact factor is provided for only those journals that are included Journal Citation Reports (JCR).
